# Campus eTranscript

Create staff efficiencies and eliminate costs associated with paper-based processing including the cost of paper, mailing, and copying. Requested electronic transcripts can be transmitted using PESC XML messaging through the included Docufide Sender integration and your school's PESC-compliant processing partner using an XML-generated file.

Support the workflow, processing and generation of PESC-compliant electronic transcripts.

Integrated Solution

Infinite Campus integration allows authorized users to efficiently request, generate and securely transmit PESC XML electronic transcripts.

• Use data managed within the system to generate electronic transcripts.

• Let parents and students manage requests and view transmission status on the Campus Portal.

• Process transcripts using Docufide Sender integration to transmit individual or batch records.

Key Features

• Distribute electronic transcripts using the PESC XML High School Transcript Standards.

• Use to distribute electronic transcripts for early conditional or full admittance with final transcript.

• Select from preference options for assessments, diploma type and date, GPA calculation, class rank, and student identifier.

• Map assessments to PESC allowed values.

• Download one XML batch file containing multiple released records.

• Place holds on requested electronic transcripts.

• Archive released transcripts.

• Provide convenient access to Docufide by Parchment through the Campus Portal.

Move beyond paper and mail to better meet transcript creation and distribution needs with Campus eTranscript.
